

## Surface Treatments Featured at the Galvanizers Meeting 2022

March 24, 2022 at 9:00 AM EDT

### Quaker Houghton Presents Its Passivation & Cleaning Technologies for Steel

CONSHOHOCKEN, Pa., March 24, 2022 /PRNewswire/ -- In steel production, finishing processes utilize surface treatments to enhance strip readiness for its end use. An effective surface treatment application can be achieved by providing a transparent layer to prevent white rust formation on zinc and zinc-alloy coated steel strip.

Quaker Houghton (NYSE: KWR), the global leader in industrial process fluids, offers a surface treatment line of passivation and thin organic coating chemistries. The products encompass a range of hexavalent chromium (Cr6+), trivalent chromium (Cr3+) and chromium-free technology to satisfy process requirements. These products along with maintenance cleaners will be highlighted at the **Galvanizers Association 112<sup>th</sup> Meeting**.

In addition to the product exhibition, Quaker Houghton expert, **Linfeng Gou**, Lab Manager – Cleaning & Corrosion will be presenting "**Zinc Surface Chemistry & Morphology's Impact on Corrosion Performance**" during the conference sessions on March 28<sup>th</sup>.

The Galvanizers Association Meeting event focuses on advancing the quality of galvanized products industrywide and takes place in Myrtle Beach, South Carolina from March 27-30, 2022.

With a comprehensive range of steel fluid solutions that include cleaners, rolling oils, corrosion preventives, temper fluids, surface treatments, fire-resistant hydraulic fluids, industrial lubricants, equipment, and services, Quaker Houghton aims to increase productivity, reduce consumption and waste, minimize defects, and maximize safety in steel manufacturing.
